**PSA Systems is pleased to present specifications, basic installation instructions & pricing for a Variable Temperature Control Upgrade for our Standard and Large Capacity Bed Bug Ovens.**

**This upgrade will allow our customers with traditional Bed Bug Oven installations the option to convert over to a Temperature Controlled Disinfecting Oven.**

### Variable Temperature Control Upgrade Option for PSA Standard Bed Bug Oven

- Quick change, **pre-programmed**, controller replacement
- Easy self-installation
  - Instruction manual provided
  - No need for a PSA service technician
- Fully programmable digital controller allows for variable temperature settings
  - Adjustments from (120°F) to (160°F).
  - Maintains temperature (+/-5°F).
  - Temperature adjustments in 1°F increments.
  - Treatment times fully adjustable between 1 and 60 minutes (1-minute increments).
- Preset buttons for returning to original bed bug treatment parameters.
